

# RULES FOR ELECTRICAL SAFETY IN THE HOME

Read this before starting any electrical work

## KEEP INFORMED

- Look for other Good Idea Leaflets that could help you with your current project.
- Check that your Good Idea Leaflets are kept up to date. Leaflets are regularly changed to reflect product changes so keep an eye on issue dates.
- If you would like to be put on our mailing list for the Wickes booklet, call our Freephone number which is:  
**0500 300 328**
- Visit our website at [www.wickes.co.uk](http://www.wickes.co.uk)

### When did the new rules start?

- From 1 January 2005, people carrying out electrical work in homes and gardens in England and Wales will have to follow the new rules in the Building Regulations.

### Why have you introduced the new rules?

- To reduce the number of deaths, injuries and fires caused by faulty electrical installations.
- To make it harder for 'cowboy builders' to leave electrical installations in an unsafe condition.

### What should I do if I want to do some electrical work?

- See the flow chart to check if you need to tell your local authority's Building Control Department before you start the work.

### What will happen if I do not follow the Building Regulations?

- The electrical installation might not be safe.
- You will have no record of the work done.
- You may have difficulty selling your home if you do not have the right electrical safety certificates.
- Your local authority's Building Control Department may insist that you put right faulty work.

### Where can I get more information?

- From your local authority's Building Control Department.
- We publish a free 'Explanatory Booklet on the Building Regulations'.  
Phone **0870 1226 236** or visit [www.communities.gov.uk/explanatory-booklet](http://www.communities.gov.uk/explanatory-booklet) for a copy.
- 'Approved Document P' explains how to meet the new rules. You can download this free of charge from [www.communities.gov.uk/approved-documents](http://www.communities.gov.uk/approved-documents).
- Visit [www.esc.org.uk](http://www.esc.org.uk) (The Electrical Safety Council) for further advice.

Or you can buy a printed copy for £15 from RIBA Bookshops. (To order, phone **020 7256 7222** or visit [www.thebuildingregs.com](http://www.thebuildingregs.com))

### Who is going to do the work?

#### **A** You do not need to tell your local authority's Building Control Department about:

- repairs, replacements and maintenance work; or
- extra power points or lighting points or other alterations to existing circuits (except in a kitchen or bathroom, or outdoors).

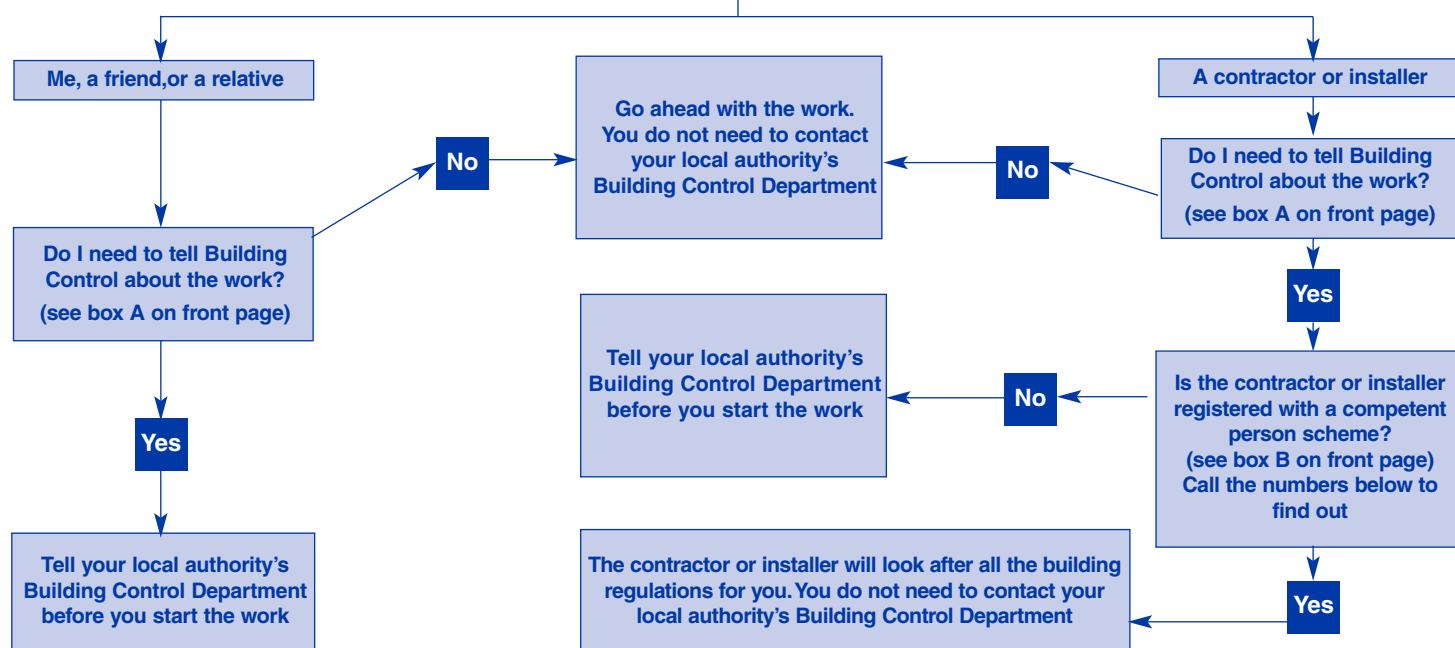

You need to tell them about most other work. If you are not sure about this, or you have any questions, ask your local authority's Building Control Department.

#### **B** Why should I use an installer who is registered with a competent person scheme?

- Members of schemes can deal with all the new rules for you.
- Members are qualified to carry out electrical work.
- Members will give you a certificate to confirm their work follows the new rules.
- You will not have to pay Building Control charges.
- You will have the option of taking out an insurance-backed guarantee for the work.
- You will have access to a formal complaints procedure if you are not happy with the work.

To contact one of the competent person schemes, phone one of the numbers given over the page. Registered installers are in the process of becoming members of the new building trades Quality Schemes launched in 2005. Quality Schemes members will offer consumer's more protection than the minimum protection registered installers must offer.

## WHO IS GOING TO DO THE WORK?

• Members of schemes can deal with all the new rules for you. • Members are qualified to carry out electrical work. • Members will give you a certificate to confirm their work follows the new rules. • You will not have to pay Building Control charges. • You will have the option of taking out an insurance-backed guarantee for the work. • You will have access to a formal complaints procedure if you are not happy with the work.
